25 Years of *Cedis* Care Products
A Strong Image for What We Have Accomplished Together

Sharing with you!

It is nice to have a perfectly matching product for every customer's request. This strengthens your advisory competence, creates customer satisfaction, increases your company success.

In time for the anniversary celebration, the next tier of innovative care products for earmolds and hearing systems is ready for presentation.

Due to the terrific customer benefits, you will strengthen your customer relationships. Your road to success.

The EUHA Congress 2011 serves as kick-off to the 25-Years-of-*Cedis* special offers – all year around. Starting now, benefit from practical and useful care packages, favorable offers and, of course, continuous new *Cedis* products.

Pages 3 – 6 will get the ball rolling.

EUHA Special

Cedis Care Products
The Novelties

Cedis Cleansing Spray Mini + Microfiber Cloth
Hygenic certainty while on the road

The beloved cleansing spray is now available in credit card size to take with you wherever you go. Apply and after 1 minute dry the surface thoroughly with a cloth. The mini spray is propellant-free and long-lasting with approx. 50 applications – it is bound to last even through an extended vacation.

REF 86749

Cedis Cleansing Foam
The proven cleansing liquid now as powerful foam

Simple application: Apply foam to a cloth. Clean the hearing system or earmold. After 1 minute dry with a dry cloth. The content will last for approx. 100 applications. Propellant-free. Your customers will like it.

REF 86780

Cedis Double Box with 40 Dry and 40 Moist Wipes
Now even more user-friendly

The moist wipes will effectively remove deposits on hearing systems and earmolds. Let stand 1 minute. Then the dry wipes will absorb any residues left on the surface. Not only handy in the acoustician shop, but also excellent for your customers!

REF 87269

Cedis Cleansing Wipes, Refill Pack, 90 Wipes
For the large dispenser of cleansing wipes

Now also available as refill pack for the large dispenser of cleansing wipes. The tried-and-true wipes are ideal for quickly and thoroughly cleaning and also for disinfecting (bactericidal, fungicidal and hepatovirucidal) earmolds and hearing systems. Less waste, lower price. 1 pack contains 90 wipes (shrink-wrapped).

REF 87204

EUHA Special

Cedis UV-C Technology
Innovative Hygiene with UV-C Light

Hygienic Cleansing Effect via UV-C Light

Common in drinking water purification, sanitization with UV-C light is also used today in hospitals to reduce infections caused by resistant germs. The food industry uses UV-C light not only for the sanitization of air and surfaces during production, but in addition it has found that mildew build-up on radiation-treated bread is also reduced considerably.

Ultraviolet rays form a part of the natural sunlight spectrum. In the range of wavelengths from 253.7 nm they destroy bacteria, viruses, yeasts and mildew. Air and surfaces are sanitized, and the growth of microorganisms is stopped effectively. In addition, this method works against the antibiotic resistance of viruses and bacteria.

Cedis Profi UVC Clean

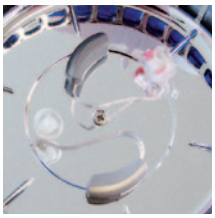
For a clean and healthy work procedure in the acoustician shop

A professional device for quick and thorough cleansing of hearing systems and ear-molds by using UV-C light. In completion to the ultrasonic device, the *Cedis* Profi UVC Clean offers optimum protection against germs. The device comes with an appealing design and is easy to operate. The use of aggressive chemicals is not necessary.

Thanks to the metalized interior, the UV-C light will penetrate even hard-to-reach areas. The greatest possible effectiveness is achieved after only a few minutes following radiation. The operating time can be pre-set to either 3 or 5 minutes. After the cycle is complete, the device will shut off automatically.

Cleaning the device's interior is completely simple: Wipe clean daily with merely a *Cedis* cleansing wipe (disinfecting).

REF 86256



EUHA Special

Cedis SanDry – 2 in 1: UV-C Light and Drying

Cleaning with UV-C Light and Drying in ONE

The new generation of devices for hygienic certainty and gentle drying. In completion to the *Cedis* cleansing products, the *Cedis* SanDry devices offer optimum protection from germs and guarantee professional drying in one.

The handy device is easy to operate and easy to clean.

Cedis SanDry *Premium*

Hygienic cleaning and electric drying with time control

- thorough cleansing process due to UV-C light source
- electric heater for drying process
- time control for electric heater (3 h/6 h)

MD Scope®
Not Just Any Video Otoscope

reddot design award
winner 2011

Always an Experience
Whether as Snapshot or Film Sequence

Impressive View. Impressed Customers.

No matter where this ergonomically designed, hand-held device appears, a glance at the auditory canal will be an experience.

The integrated 2.4" LCD screen and low battery consumption make the video otoscope a portable und convenient device to use in the fitting room, service area, during home visits, health exhibitions, etc.

With daylight-like illumination of the viewing area, the high-quality miniature camera provides a fascinating view into the auditory canal or onto the eardrum.

Thanks to the auto focus, taking high-resolution snapshots is as easy as pressing a button. With an USB Image Dongle (available separately) video recordings and snapshots can be stored directly to a computer.

MD Scope®

Extensively equipped

- video otoscope with removable camera module
- funnel starter set and protective cover for camera
- 2 LR06/AA batteries (for up to 4 hours of continuous operation)
- cable for video out
- user instructions and warranty card
- USB Image Dongle (optional)

REF 26630 – Set without Dongle
REF 26633 – Set with Dongle
REF 26631 – USB Image Dongle

KaWe Otoscope Family
See It All

KaWe Piccolight® C
Robust and accurate at a fantastic cost-benefit-ratio

- 3X magnification, pivotable
- vacuum bulb 2.5 V
- illumination performance of 7,000 Lux
- battery handle for 2 x LR06/AA batteries (included in delivery)
- metal clip
- compatible with funnels from the egger product range
- with carrying bag
- with 2 x 10 disposable funnels (2.5 and 4 mm)
- color: black

- gentle charging process – independent of the battery's charging status
- overcharging protection – automatic shut-off after the charging process is complete
- charging display with blinking indicator (charging process) or solid indicator (completely charged)

Heine mini 3000® complete set – REF 26626

Stand for Heine Otoscope/Ear Light
Tidy and always at one's fingertips

With included inserts for use with various Heine otoscopes.
Otoscope not included.

REF 26625

Do You Know the Inventors of the In-Ear Technology?

How do you know each other, you ask?

Maybe from the myriad of (musicians') ears that have worn and now have become unimaginable to be seen without the legendary "ER 9/15/25" hearing protectors? Or maybe the uniquely different looking standard lamella hearing protection "ER 20"? Or one of the other successful products by Etymotic Research, based near Chicago/USA.

The team of engineers surrounding the company's founder Dr. Mead Killion – audiologist, engineer, inventor and passionate jazz musician – has generated over 100 patents. One of these is the K-Amp hearing aid amplifier (Killion amplifier). Therefore, in the late 80s/early 90s, the company had added another chapter to the history of hearing acoustics.

By developing the high-quality audiometrics insert earphones (with distinctive yellow foam plugs), audiometers could advance to an extended "listening world". Thus, it was only natural for the inventors of the in-ear-technology to use this to produce an entire range of insert earphones series characterized by superior sound and noise isolation. Meanwhile, even the ears of the most sceptical critics have broken into applause and will confirm: Other earphones with comparable prices just don't sound nearly as good.

The product range also includes:

- bluetooth headset – delicate, noise-canceling, with superior listening quality and speech intelligibility
- electronic hearing protection – a brand-new, intelligent product family, all deviced come in a small, in-the-ear-styled shape
- earphones with volume control – clever design and intended primarily for the protection of the younger generation's hearing; but also highly recommendable for "elderly ears".

In all product areas new developments are constantly on the forefront and modifications are either in the making or are about to be launched on the market. The aim is to provide people of all ages with a unique listening experience and to protect their hearing at the same time. For best possible wearing comfort all products can be equipped with custom-fit eartips.

On the next pages, we will be happy to take you for a short walk through the consistent product portfolio. We will take you along the pioneering path on the road to new customers. Are you ready for the promising prospects of success?

Insert Earphones
Headset + Earphones

Market Leader for More Than 25 Years

Etymotic Research has been recognized as the market leader in the in-ear technology sector for more than 25 years. The result were the pioneering insert earphones for people who value superior sound quality. Linked to each series, these earphones are additionally available in the Headset + earphones version. Apart from perfect listening and speech intelligibility quality, this version guarantees the highest possible safety level when in use. To that end, Etymotic offers the "App Awareness!™" tool, with which the level of noise isolation can be selected and surroundings will remain audible e.g. in road traffic or while exercising. More information will be available shortly from egger or visit www.etymotic.com /awareness.

HF Series – High-Fidelity for the Ears

Superior sound
Strong design
Kevlar-reinforced cable
Many accessories
Beloved among musicians, music and audio book lovers

The New, Individual Hearing Protector

ePRO-X

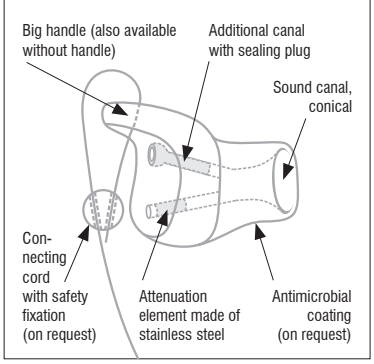
Its exemplary benefit for customers will vitalize your success. Due to its versatility noise will be toned down. Manufactured individually after impression taking using comfortably soft material, ePRO-X is simply a joy to wear.

Whether with handle for easy handling or without handle to meet the high cosmetic standard, it always looks its best.

Five different attenuation elements out of stainless steel are ready to counter almost any type of noise. A pioneering second sound canal offers the possibility of connecting a special type of headphone or headset (in processing as of this writing). ePRO-X is fit for the execution of the required quality checks of hearing protectors in Germany. In addition, the ePRO-X comes with: handy case with belt clip, user instructions, warranty card, cerumen pin, care gel and cleansing wipe.

Optional accessories: removable connecting cord, collar clip, antimicrobial coating, individual marking, multiple colors.

ePRO-X has been tested by Germany's Institute for Occupational Safety and Health (IFA). It conforms to the regulations of Directive 89/686/EEC (Personal Protective Equipment) and EN 352-2:2002.



Big handle (also available without handle)
Additional canal with sealing plug
Sound canal, conical
Con-necting cord with safety fixation (on request)
Attenuation element made of stainless steel
Antimicrobial coating (on request)
